

The Hero Classroom™

Can Your Students Save The Day?

Context Clues

1st – 2nd Grade

Students will engage in a theatrical story told via texts, videos, pictures, video-calls and phone-calls. They must help others escape from The Super Villain & engage with specific content at the same time.

The Hero Classroom is designed by the Creators of

THE ESCAPE CLASSROOM

www.TheEscapeClassroom.com

What's the difference between our products?

THE ESCAPE CLASSROOM

Students compete against other teams in order to escape the classroom before the clock ticks down to zero. One of our Super Villains has locked them inside of the classroom but has placed clues within the classroom so that they may escape. Our Escapes are designed around specific curriculum.

THE ADVENTURE CLASSROOM

Students have found themselves inside of a story. They will have to choose their own adventure. In order to complete the story, students must answer a series of questions based on a specific curriculum. Each Adventure is told by one of our Super Villains with a high level of video interaction.

THE MYSTERY CLASSROOM

Your students have been chosen by Anonymous, to help him figure out which Super Villain "did it". They must answer a series of questions based on specific curriculum in order to unlock clues & testimonies. After they have unlocked all of the clues & testimonies, then they must solve the mystery and figure out "who did it".

The Hero Classroom

Students have joined the ranks of Anonymous. They will engage in a theatrical story told via texts, videos, pictures, video-calls and phone-calls. They will have to figure out how to help the person in need escape from one of our Super Villains. Students will have to answer questions based on specific curriculum in order to successfully save the day and defeat the Super Villain.... or not.

How To Conduct The Hero Classroom

Step 1:

This product is designed for an individual student (not a group). It can be done in the classroom or used as a homework assignment. This product is an online theatrical educational resource.

Step 2:

Give each student a **Starter Card**. Students can either scan the QR Code or enter the tiny URL. It is advised to use either a computer or tablet. **Do not use a smart phone.**

Step 3:

Students will complete the immersive story to figure out if they saved the day or failed to save the day. At the end of the game there will be a code. Students will need to present you the confirmation code to confirm that they have completed the assignment.

Step 4:

Each confirmation code will have a letter before it. Either **H** or **NH**. **H** stands to “**Hero**” – this means they saved the day. **NH** stands for “**Not Hero**” – this means they failed to save the day. The remaining digits will be the same.
